

Each paper type gives your motif a unique touch. Select from one of available options to suit your taste with our high-quality design and layout selection.

Hahnemühle® - Glossy FineArt Pearl® 285 gsm, format A2

The bright white of FineArt Pearl enables impressive contrasts and pictorial depth in black and white or colour photography. The special coating provides a pearl-finish.

The surface has the look and feel of an art paper and is therefore particularly popular with art-oriented photographers. A special coating provides for the typical pearly effect. The extraordinary contrasts as well as depths of the image achieve an enormous color dynamics.

Specialized photo journals refer to this FineArt paper as an exceptional publication among the photo papers. Above all the silky finish gives this surface a very noble impression.

FujiFilm® - Crystal Archive DP II

Crystal Archive Paper Type II give print output results in vivid color reproduction, brilliant whites, plus distinct highlight detail. This means you will receive prints filled with beautiful color, from subtle shades of green, to vivid blues and reds, together with brilliant whiteness, and clear and distinct highlight details.

Crystal Archive image stability assures your color photographs will withstand the test of time with unparalleled print permanence.

SAMPLES

Hahnemühle – FineArt Pearl®

Paper Prints

FujiFilm® Crystal Archive DP II
Matt 234 gsm

The premium poster matt reduces reflections to a minimum and at the same time achieves a particularly natural color reproduction.

FujiFilm® Crystal Archive DP II
Silk 246 gsm

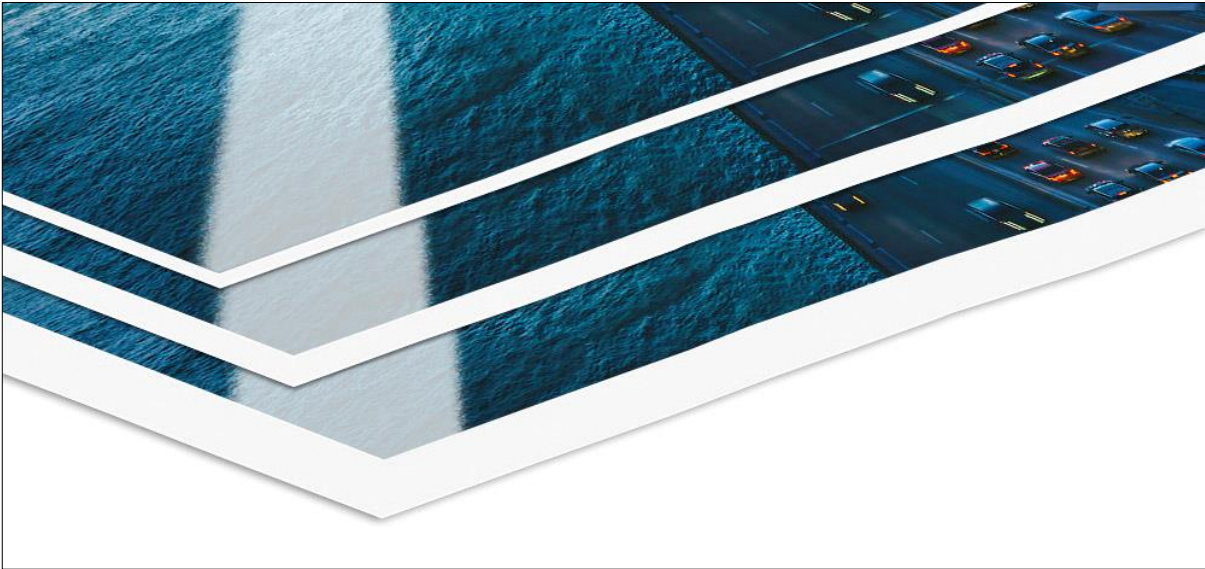

For photos that also appeal to your touch: The premium photo paper silk screen gives your pictures a noticeably sublime structure. Colors become more powerful in their effect, the motif gets a touch of retro. Especially portrait photographs benefit.

FujiFilm® Crystal Archive DP II
FineArt Matt 307 gsm

Matt is modern: the paper quality Fine Art Matt has an almost velvety paper structure, which makes itself also visually noticeable. Above all, photos in black and white and landscape shots gain in effect.
